

EASYLINK MP

CONNECTING THE WORLD - 2 POINTS AT A TIME

Preconfigured Multipoint IP67 Wireless Bridge Kit
Establish a Point-to-Multipoint Network in seconds

PLUG & PLAY

EtherWAN's EasyLink MP is a pre-configured point to Multipoint Bridge kit which allows for connecting remote locations wirelessly up to 2 miles away. No need for complicated setup software, just plug it in, aim it and you are connected.

FEATURES AND BENEFITS

➔ Easy

- Mount units to a pole or wall using included mount kit
- Signal strength LED's for easy alignment
- Just power and align using supplied PoE injectors and power supplies

➔ Hardened-Grade for Outdoor & Harsh Environments

- Fanless and ruggedized outdoor IP67 enclosure (Rainproof)
- Wide operating temperature range (-40° to 167°F)
- Connections up to 2 miles away

➔ Highly Secure

- Encrypted & Authenticated Wireless Connection (WPA2)
- Every kit has unique SSID and security settings
- Management Frame Protection (MFP) enabled

A close-up photograph of the rear panel of a vintage beige computer terminal. The panel features a large, dark circular BNC connector on the right side. To its left is a horizontal row of five small, dark circular ports. Further left are two circular speaker grilles. The device is mounted on a light-colored surface, and the background is a plain, light gray.

About EtherWAN

EtherWAN is a leader in useful and easy to configure Power over Ethernet solutions. Our PoE products are built to support the long-term health of your network and come in a wide variety of form factors. Designed to operate in a number of environmental conditions, they provide the right networking solution for urban infrastructure communication applications.

Founded in 1996 by NASA engineers, EtherWAN provides Ethernet connectivity solutions for Urban Infrastructure with a core focus on reliability in extreme environments. In-house product design, engineering, and manufacturing are structured to provide quality for crucial connectivity applications.

Tech Support

US-based tech support provides guidance throughout the project life-cycle. Get support onsite or over the phone.

Quality

To ensure high performance, our products undergo rigorous 100% burn-in testing in extreme temperatures (175°F+) under a heavy data load.

Training for Real-World Applications

Our industry- specific network and product-focused courses are offered online and in-person for easy accessibility.

Purpose-Built Products

Products are designed, tested and manufactured in-house to ensure the highest quality solutions for specific applications.

Customer Experience Lab

Train employees and make educated buying decisions with hands-on access to mock traffic intersections, TMC, a variety of IP cameras, and more.

Cost Savings

Reduce installation time and costs through flexible network solutions, whether installing new cabling or utilizing existing systems.

Contact us for more information on how we can help you design your network.
